International Arrivals

Passports

Arrival.

The team has just arrived at Chicago O'Hare International Airport. All of them, with the possible exception of Mike, are excited to attend this year's AACC congress to see what's new in the field of morphology. First stop at the convention will be the CellaVision booth # 636 where Digi is invited to the arrival and pre-launch of her secret project.

Look out for the next issue in September.
