

Meanwhile in the world of morphology ...

Search. Find.

The choice between searching the archive...

Finding slides or records in the archive can be frustrating. We have all experienced this. Nevertheless, at times it is absolutely crucial that we find the information we are looking for. Today, we find Mike in the cellar frantically searching for a slide from last month's differentials.

... or finding peace of mind.

Meanwhile Digi has also been searching for the same information. The difference is that with the digital search function provided by CellaVision, it takes fractions of a second for Digi to find all records in a patient file. Now it's time to search for Mike and find lunch.
