

*Meanwhile in the top secret testing area...*

## Opinion. Leader.

There's some unusual activity in the Lab this month. Something big, but small. Something digital and new that has landed on Digi's desk.

Mike doesn't exactly know what Digi is doing, he only knows that she has been asked to test something new for CellaVision. In Mike's opinion he would like to see Anna Log concentrating on her microscope. Anna on the other hand is wondering how Digi became such a valued Opinion Leader for CellaVision.

Look out for the next issue in July.
